

CANADIAN INTERNATIONAL COLLEGE (CIC)

المعهد الكندي العالى للإدارة ـ السيادس من أكتوبر

COURSE NAME: DATABASE 2

COURSE CODE: B18-INFO 342

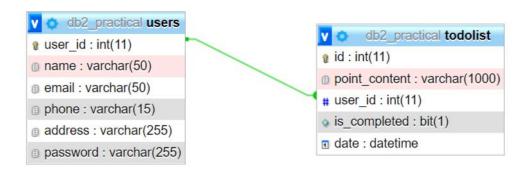

Date: 12/27/2022

COORDINATOR:
MARKS: [15]
Time: [1 Hour]

Final Lab Exam

Model (A)

Observe the following Database schema:

- Q1) Write a SQL query to get all users `name`/`email` & the corresponding `point_content`/`is_completed` IF EXISTS.
- Q2) Write a SQL query to get `point_content`/ date` for user whose name is `Ahmed Arafat`.
- Q3) Write a SQL query to create a trigger when a deleting event is performed on table `user` that print the corresponding `point_content` for that user instead of deleting it then drop that trigger.
- Q4) Create a parametrized stored procedure to insert a new record in `todolist` table, then drop that procedure.
- Q5) Write a SQL query to add a check constraint on `date` to make sure that date is less than `1-1-2023`, then create a SQL query to no check this constraint then drop it.
- Then write a SQL query to add a unique constraint on `email` then drop it.
- Finally write a SQL query to add a default constraint on `is_completed` to zero then drop it.
